

## **Weiss AG Launched Its Visual Asset Management Application VAM2 in a SaaS offering.**

### **Summary**

VAM2 is the leading browser-based Visual Asset Management application used by large organizations and Fortune 500 companies. With their unique Software as a Service offering released this week, accessing the technology is now opened up for small enterprises, agencies, and even individuals.

### **Body**

**(March 20, 2020)** -Companies across the world need a partner who can help them with industry-specific knowledge, competitive pricing, and market insight so that they can create stunning projects and services. Being a Visual Asset Management or VAM pioneer since 2003, they are experts in addressing the business needs of their clients concerning the different applications and markets.

They released their Software as a Service or SaaS offering on March 16, 2020 and it makes access for smaller companies, agencies, and even micro-enterprises convenient at an entry price. To avail it, all that one needs is a browser to start creating astonishing projects that clients will love. It is available for both monthly and yearly subscriptions in 3 plans - professional, which is perfect for individuals, agency which is apt for growing businesses, and enterprise which suits the needs of established companies.

They are available for €129/month, €499/month, and €1490/month, respectively. You can convince yourself and book a fully functional and free test-server via the [vam2.com](https://vam2.com) website. Along with this, they are also offering an exclusive 10% release party discount for all orders before Friday, April 3rd, 2020.

### **About VAM2**

**VAM2** is developed, serviced, and administrated by and from the Weiss AG headquarter in Germany. They help clients and partners worldwide to master their projects in more than 30 different market applications. Combining all file formats without limitations brings a variety of projects to life - from drone inspections to laser scan projects, photogrammetry, 360 still and video documents, audios,

Their journey started in 2011 when they were approached by Shell USA to develop a Visual Asset Management application to document drilling platforms -the beginning of the first purely web browser-based VAM system. Thanks to VAM2, every digital format can now be managed, connected, and distributed to clients on a single digital platform without losing data ownership. To create, share, and deliver top professional multimedia libraries and to make them accessible from virtually anywhere now only requires a browser.

In days of extended homework and limited travel capabilities, VAM2 is the perfect tool still master your job by virtually accessing real-world sites and digital twins.
